NOTES

SHARE YOUR ACCOMPLISHMENT!

Meets Specifications

Correctness

If your code passes the provided tests in test.py then your project will meet specification for this criteria.

Congratulations, you have passed all the tests! You have demonstrated good understanding of matrix fundamental and Python. Well done!

determinant() of matrix is calculated the right way and we get the correct output.

trace() of matrix is calculated the right way and we get the correct output.

inverse() of matrix is calculated the right way and we get the correct output.

T() (transpose) of matrix is calculated the right way and we get the correct output.

add() is calculated the right way and we get the correct output.

neg() is calculated the right way and we get the correct output.

sub() is calculated the right way and we get the correct output.

mul() is calculated the right way and we get the correct output.

rmul() is calculated the right way and we get the correct output.

Code Quality

Code quality issues should NOT make a project non-passing. If the code works the project should pass. But readability is important so try to go through your code before submitting to make sure that a reviewer will be able to provide the most helpful feedback for you.

Not only did you write Python code but you wrote it in simple, efficient and pythonic way. Very good job!
